

Lastbilnettet version 1.2

Export XML format

- 1) Lastbilnettet is using this as default xml format to import data from your site into lastbilnettet.dk. In order to make import, you must provide lastbilnettet.dk an xml structure as shown below.
- 2) Forward your xml formatted URL like "www.yourwebsite.com/myxml.asp" or any URL you have presenting this xml then you are now included on our automatik feed list.
- 3) Once the xml feed is provided the team at Lastbilnettet will match your product categories with the internal categories and the automation is ready to go.

description

example

```
<emnetype>Hejs</emnetype>
```

Tag name **fabrikat** (Brand)

description

example

```
<fabrikat>Abeko</fabrikat>
```

Tag name **model** (model)

description

example

```
<model>Ducato</model>
```

Tag name **opbygning** (structure)

description

example

```
<opbygning>Autotransport</opbygning>
```

Tag name **aksel** (Axle)

description

example

```
<aksel>8x4</aksel>
```

Tag name	aargang (Year)
description	
example	<aargang>1997</aargang>
Tag name	refnr (Reference No.)
description	
example	<refnr>1253</refnr>

description *This will be the advert or item description. This must be enclosed by <![CDATA[product description here]]> so we can avoid conflicts on characters,*

example

```
<beskrivelse>
  <![CDATA[ Iwaki Magnetpumpe F40 1AAVT - E Pumpehus i kemikalieresistent
kunststof. Motor 380V 50Hz Kap. ca 600L/timen Fab. 1997 Vnr 138 0009 ]]>
</beskrivelse>
```

Notes:

- Please use unique ids for `<emneid></emneid>`, duplicate id's will overwrite one another.
- All fields are optional except `<emneid></emneid>`
- If you have empty tags, you can leave tag as `<model></model>` or `<model/>`.
- Tags name must be spelled correctly.
- You can visit <http://www.xmlvalidation.com/> to validate your xml
- We also have a sample feed at <http://lastbilnettet.dk/import/feed.asp> for your reference.
